

# Photo Log Guidelines

Record the date and provide a brief description of the subject of the photo. Be sure to fill in the photo log at least daily, you can use the LCD to go back and view your pics while they are fresh in your memory. Spacer pictures are useful to separate days or pics of different individuals of the same species (for example two TLB interactions in a row). Include a description of the spacer **photo** being taken so it can be accounted for. Please start the subject line with "VIDEO" if the recording is video.

Examples:

## PHOTO LOG
