

2007 Financial Performance of Federally Permitted Shrimp Vessels in the Gulf of Mexico

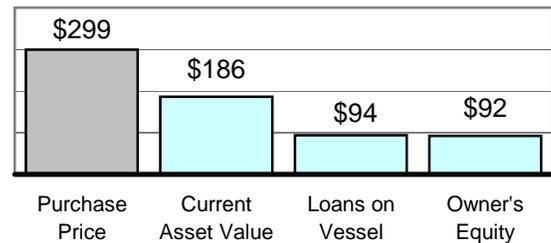

This fact sheet presents results from the annual economic survey of Gulf shrimp vessels with federal permits. Data are collected annually with a two-page survey that is sent to a random sample of about 30 percent of permitted vessels. The information will be used to assess trends in the financial and economic state of the fishery, and to determine the economic and social effects of regulations and other factors affecting the fishery. The 2007 survey response rate was almost 87%, resulting in 505 complete and usable surveys, including 388 active Gulf shrimp vessels

Results for the active Gulf shrimp fleet (Averages!):

Vessel Characteristics

Average vessel		% of vessels with	
Length (feet)	70	Hull material - Steel	78%
Gross tons	108	Refrigeration - Freezer	58%
Horse power	527	Loan on vessel	51%
Year built	1987	Insurance coverage - Hull	45%

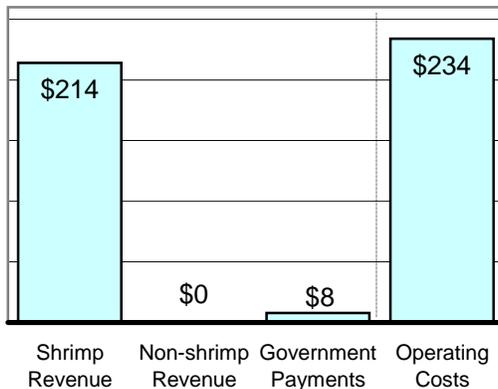

Vessel Balance Sheet (in thousands)

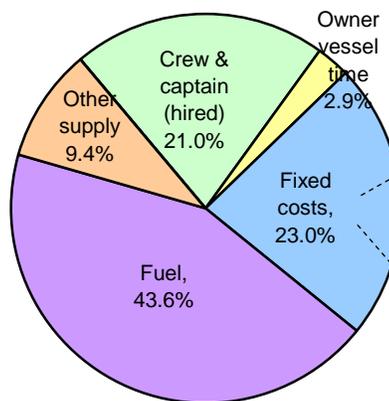

Vessel Operations

Shrimp landed (pounds heads-off)	71,380	Annual fuel use (gallons)	42,841
Shrimp price per pound	\$3.00	Fuel price per gallon	\$2.39
Owner operated vessels (%)	49%		

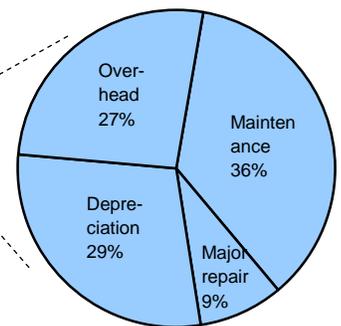

Revenue and Costs (in thousands)

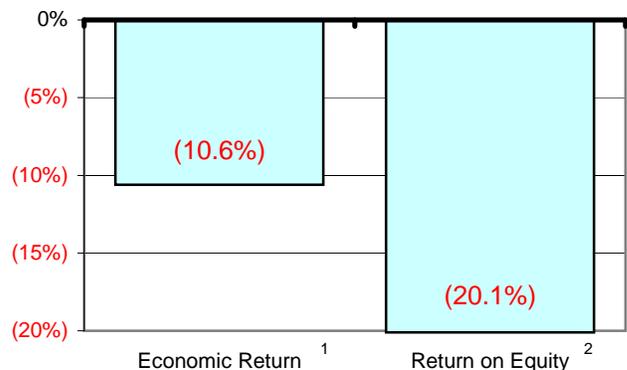

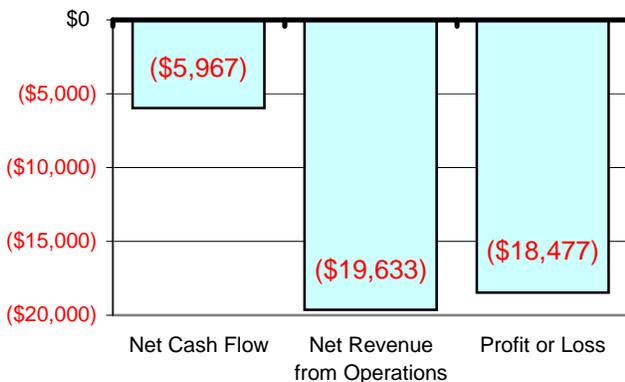

Operating Costs (%)

Fixed Costs (%)

Financial and Economic Performance

¹ Economic Return (%) = Net revenue from operations / Assets

² Return on Equity (%) = Profit or loss / Owner's equity

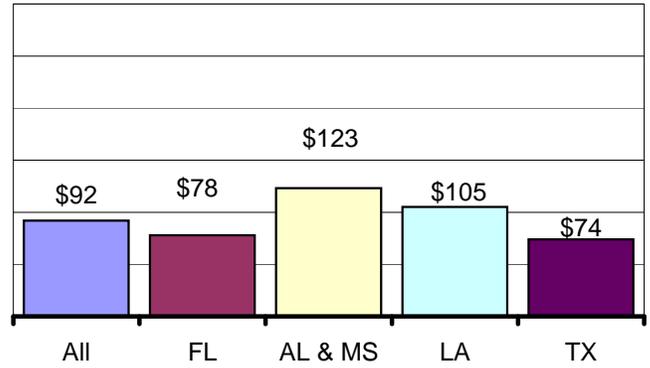

Results for the active Gulf shrimp fleet by State (Averages!):

(Number of vessels: All = 388, Florida FL = 55, Alabama & Mississippi AL & MS = 67, Louisiana LA = 108, Texas TX = 157)

Vessel Asset Value (in thousands)

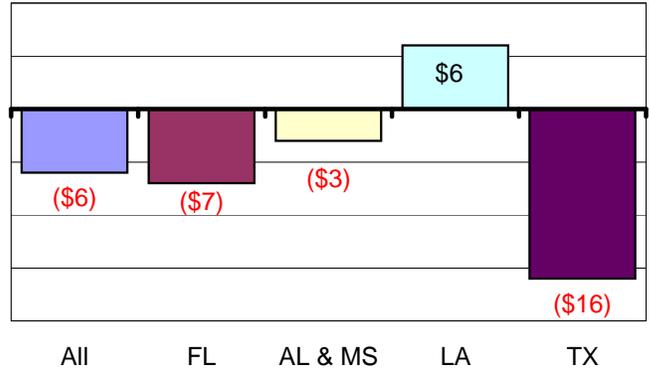

Owner's Equity (in thousands)

Shrimp Revenue (in thousands)

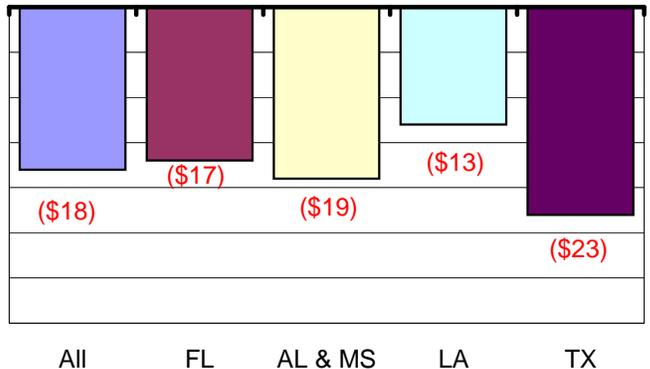

Net Cash Flow (in thousands)

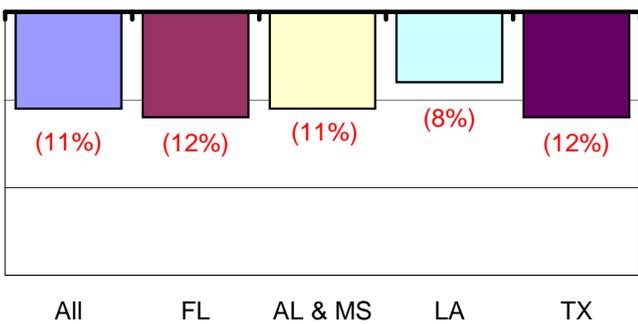

Net Revenue (in thousands)

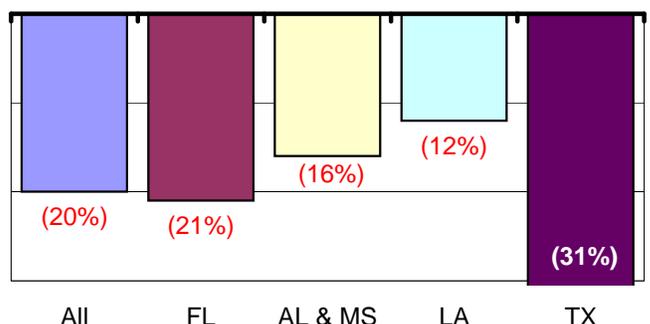

Profit or Loss (in thousands)

Economic Return (%)¹

Return on Equity (%)²
